Implementation & Evaluation

Wednesday, June 19, 2019, 1 to 2:30 pm ET &
Monday, June 24, 2019, 1 to 2:30 pm ET

SAMHSA's five-step Strategic Prevention Framework (SPF) offers practitioners comprehensive guidance for addressing the substance misuse and related behavioral health problems facing their communities. This two-part webinar series introduces Steps 4 and 5 of the model: Implementation and Evaluation.

- Part 1 will describe high-quality implementation and why it is important, review criteria for selecting prevention interventions, and explore the three central features of effective implementation.
- Part 2 will prepare participants to explain the purpose and types of evaluation, develop an outcome-based logic model to guide prevention efforts, and cover key aspects on considering when to report evaluation results to community stakeholders.

These webinars will build on the foundation established during our May webinar series - Building Community Capacity to Implement Prevention Efforts (Part 1) and Developing a Comprehensive Strategic Plan to Guide Prevention Efforts (Part 2). Participants will have a chance to discuss challenges they may be experiencing while implementing these two steps of the SPF, pose questions and provide feedback to one another on strategies for overcoming these challenges
