Learning Objectives

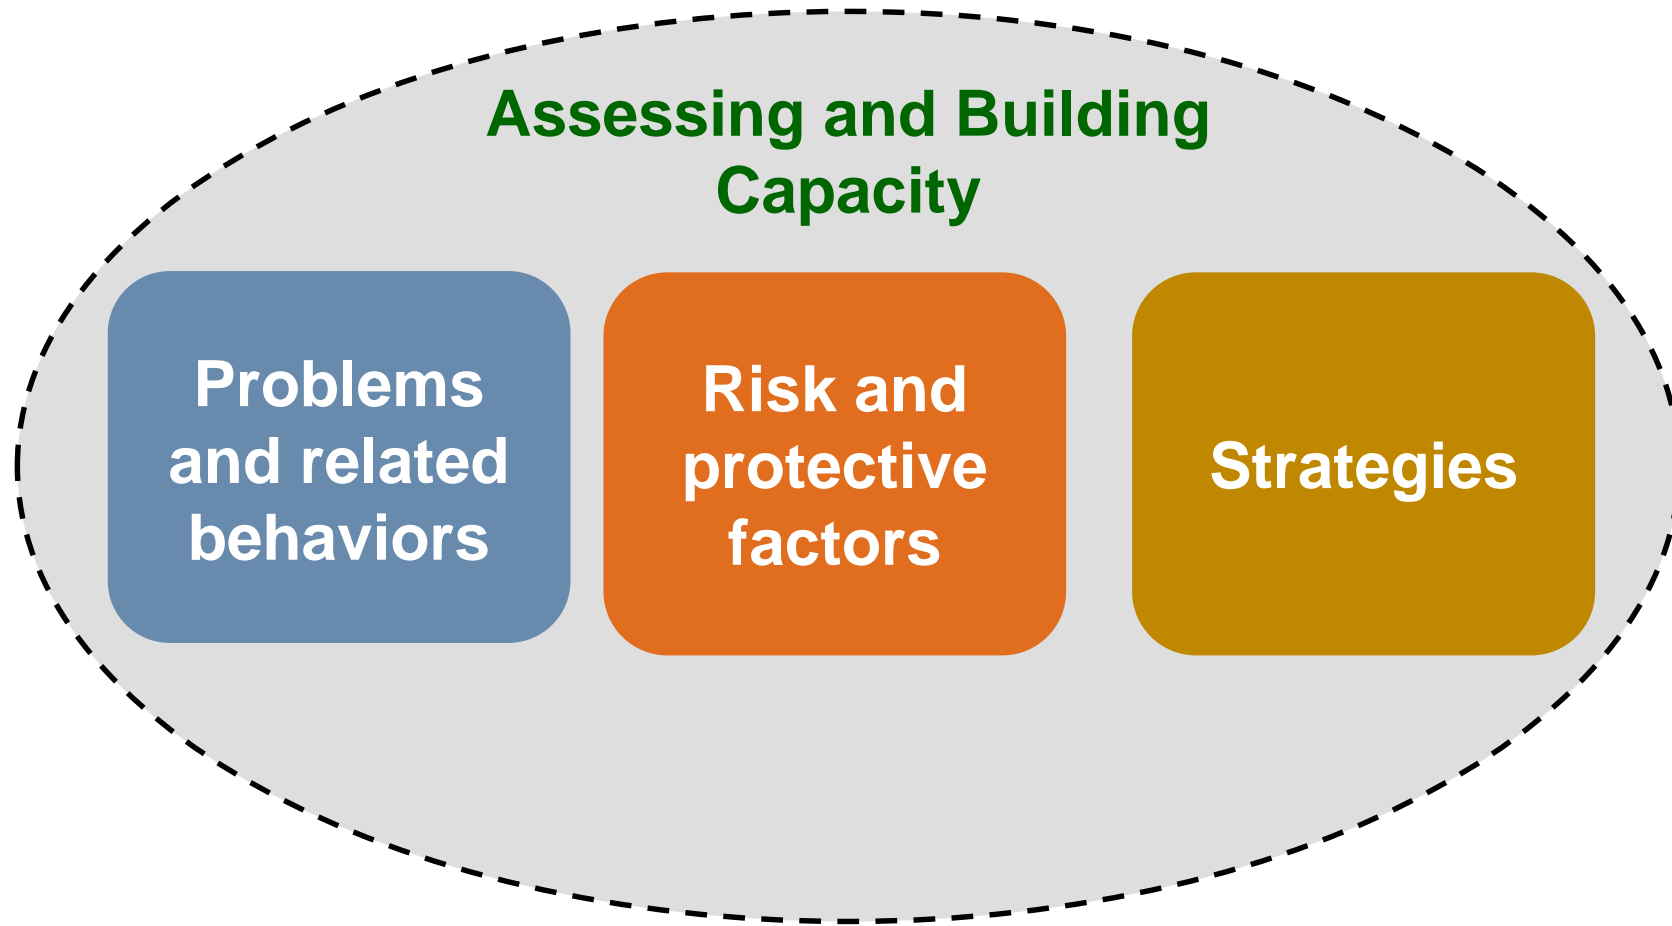

- Articulate the importance of developing a comprehensive, logical, and data-driven prevention plan
- Describe the process for establishing criteria for prioritizing risk and protective factors to address
- List criteria for identifying prevention interventions that are the “right fit” for a community
- Discuss how to integrate a focus on cultural competence and sustainability into a prevention planning process

In Search of a Comprehensive, Logical and Data-driven Prevention Plan

A Plan within a Plan

Guiding the Planning Process

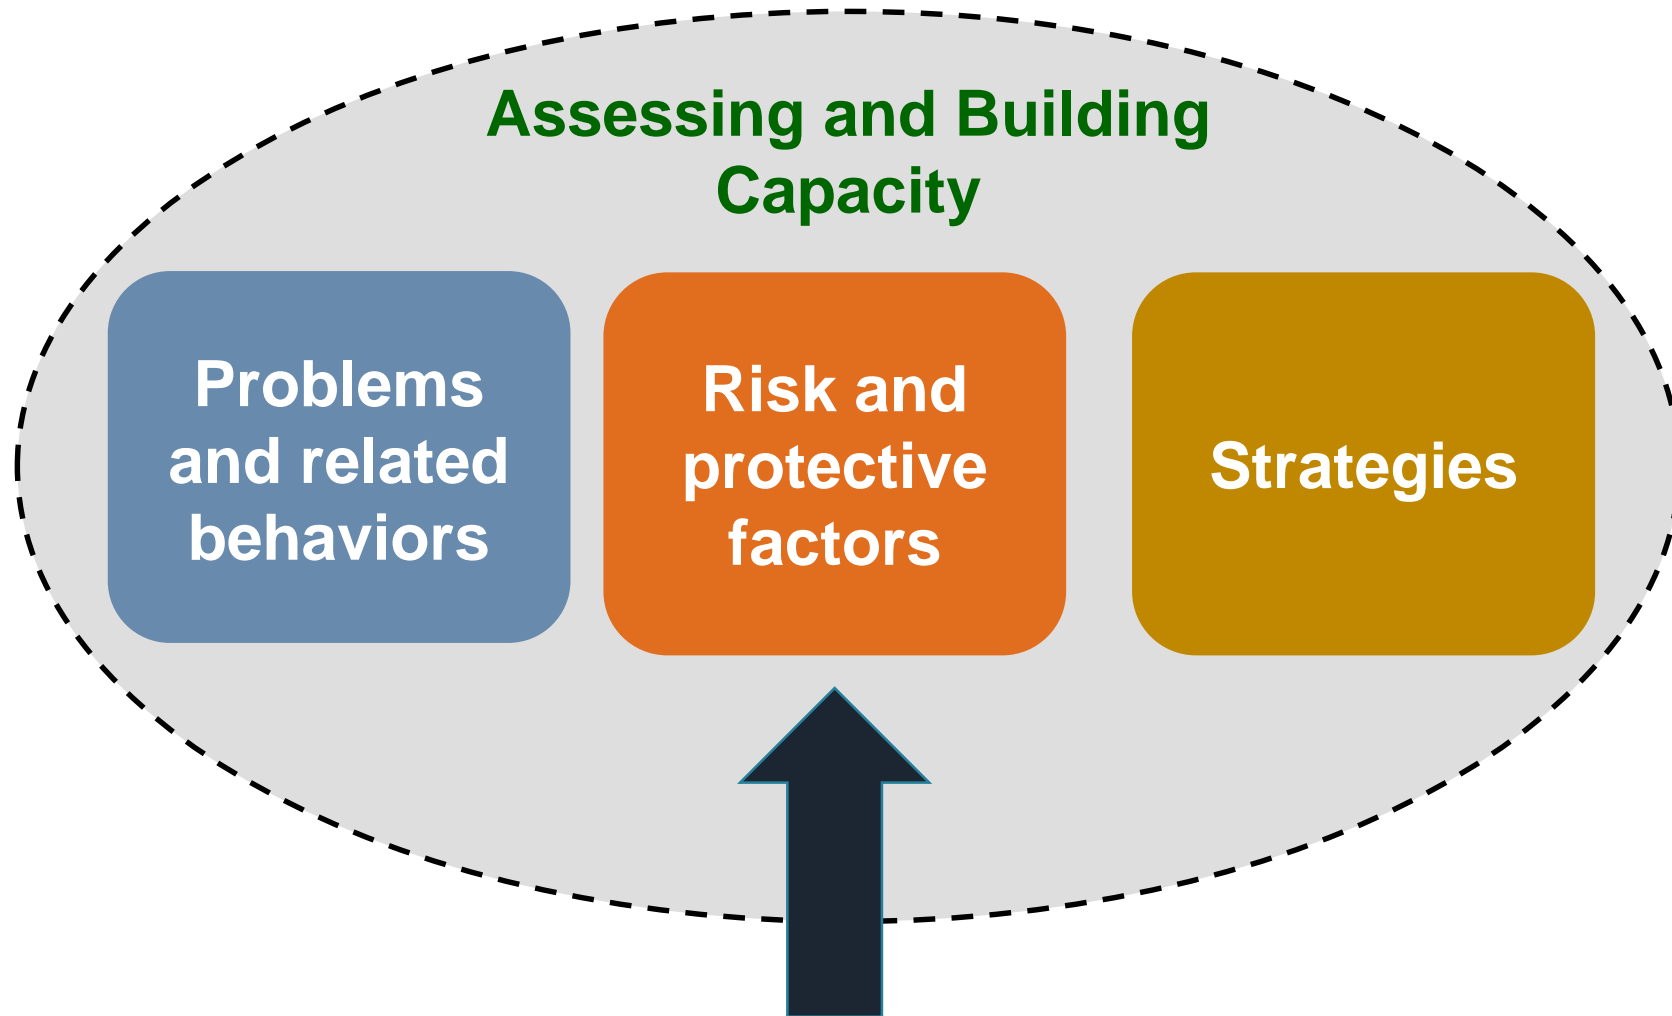

Resources, Readiness, and Strategy Selection

Prioritizing Risk and Protective Factors

Risk and Protective Factors

Prioritizing Root Causes and Local Conditions

Step 4

Importance

- How much does the risk factor influence the problem?
- Does it influence other behavioral health issues?
- Does it have an impact the developmental stage of the population?

Changeability

- Does a suitable evidence-based intervention exist?
- Is there adequate capacity to change the risk/protective factor?
- Can change occur in a reasonable amount of time?

Knowledge Check

A community coalition identifies 18-20 year olds as a priority population of focus for preventing underage drinking.

Which of these risk factors could be high importance in this community?

- Low parental monitoring
- Community norms favorable toward alcohol use
- Ease of retail access

Knowledge Check

A community identifies LGBTQ youth as a priority population for preventing tobacco use through electronic vapor products.

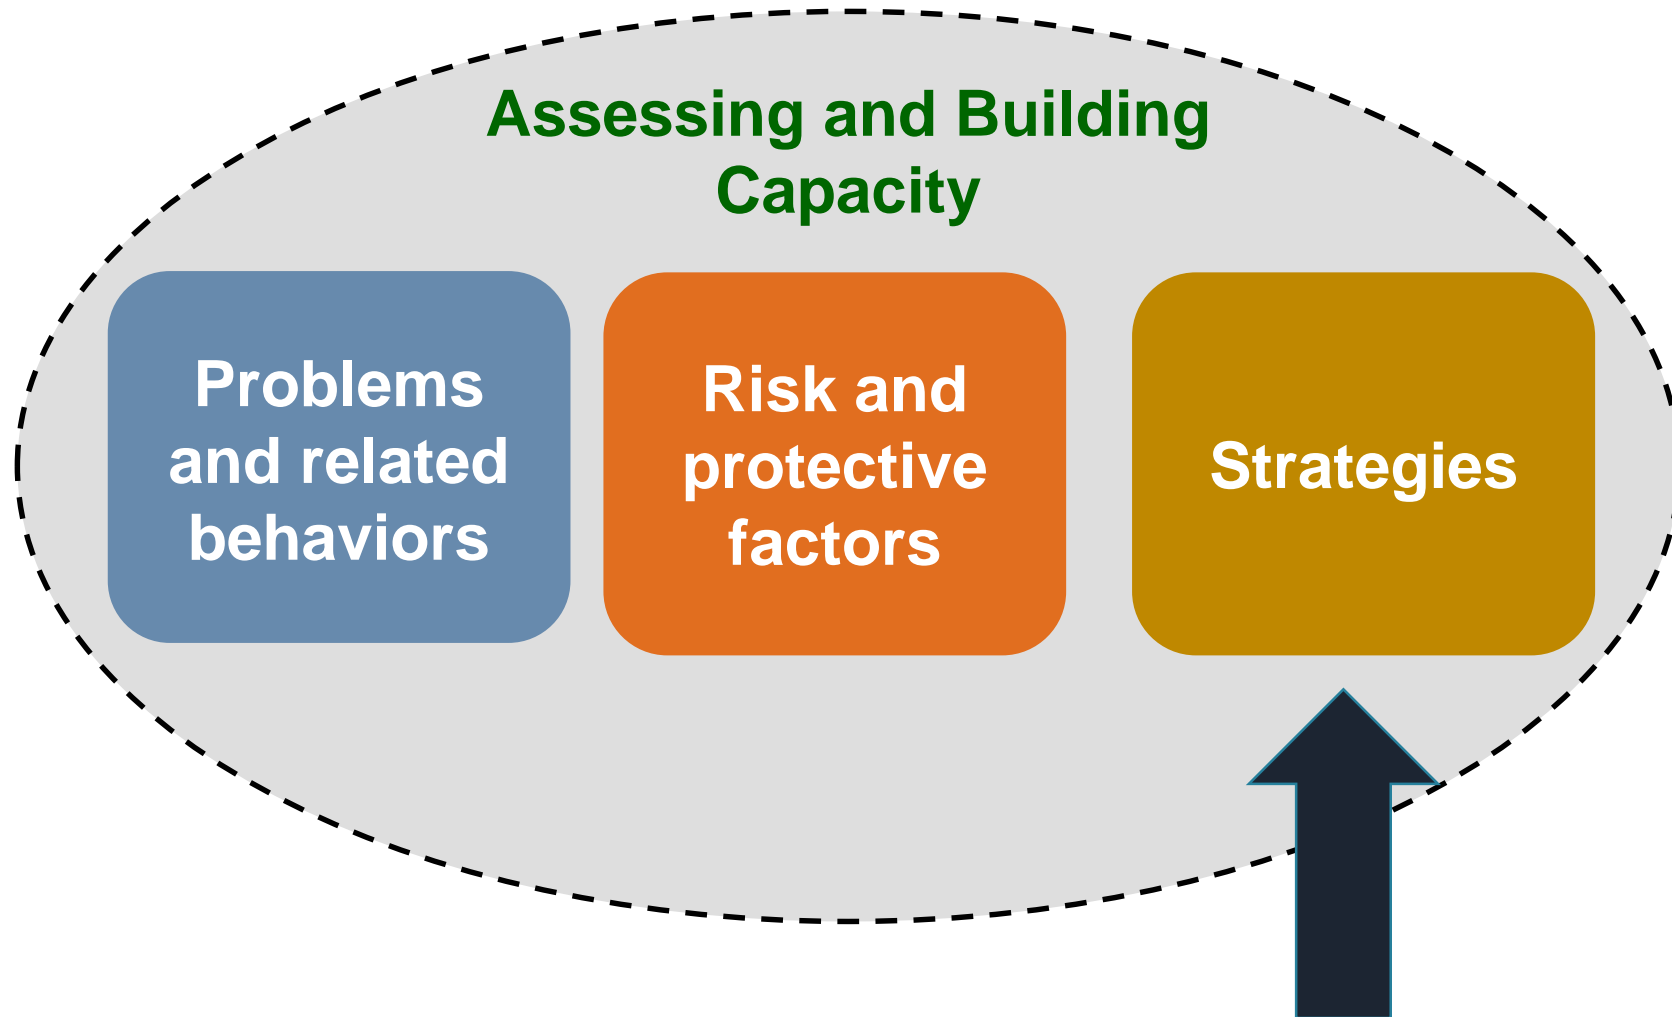

Community norms are favorable to use, as community members, including youth, do not consider vaping to be a “big deal”.

Prevention practitioners recognize that this is an issue due to skyrocketing use rates, but are not sure what to do, since few strategies exist to address it.

How changeable is this risk factor?

Selecting Strategies: *Finding the Right Fit*

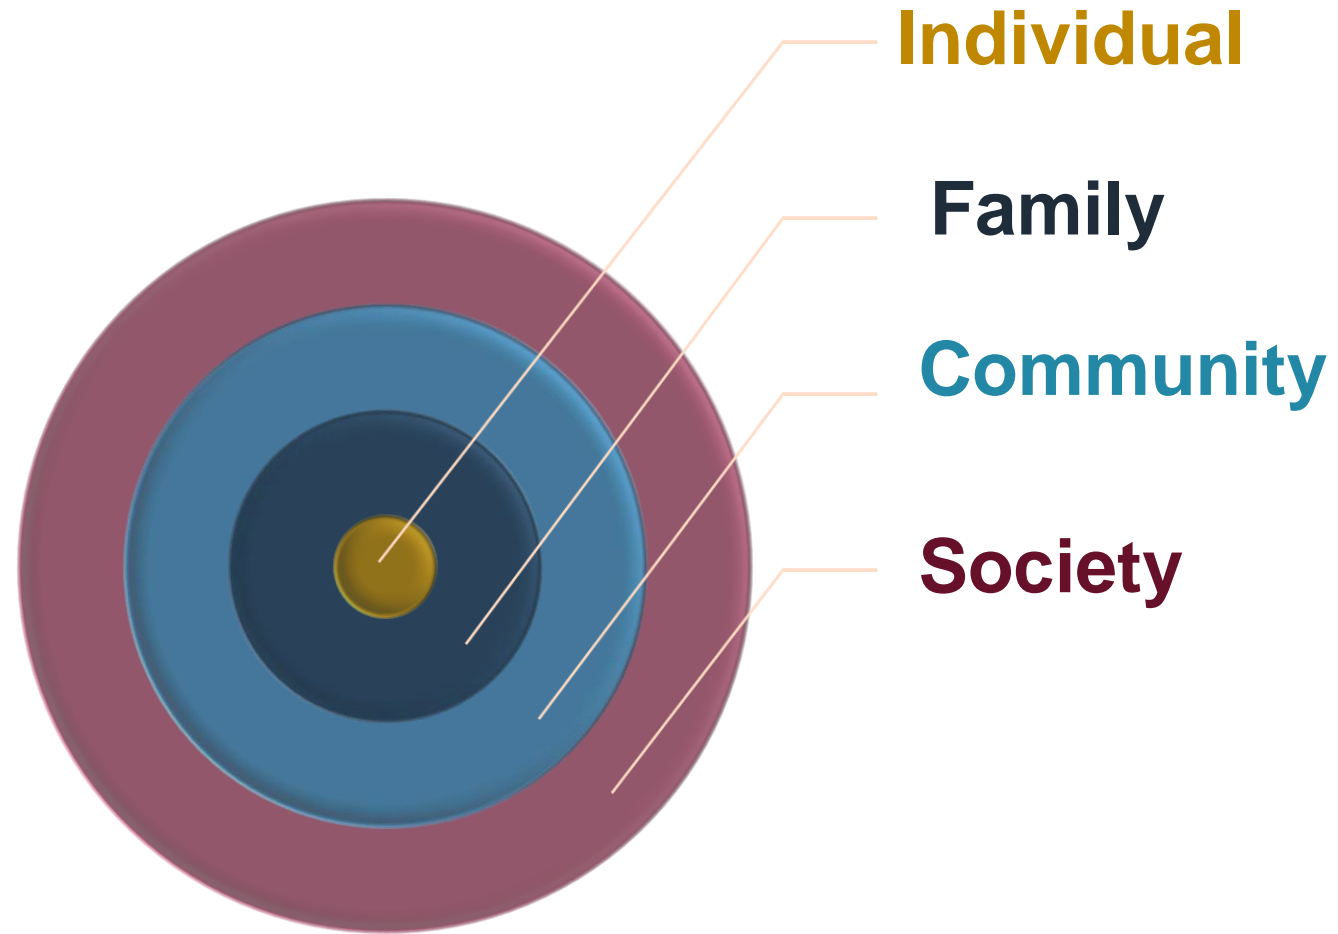

Guiding the Planning Process

Examples of Interventions

- **Education-based programs**
- **School and community bonding activities**
- **Communication and public education**
- **Policy**
- **Enforcement**

Interventions in Multiple Contexts

SELECTING INTERVENTIONS: THINGS TO CONSIDER

Effectiveness

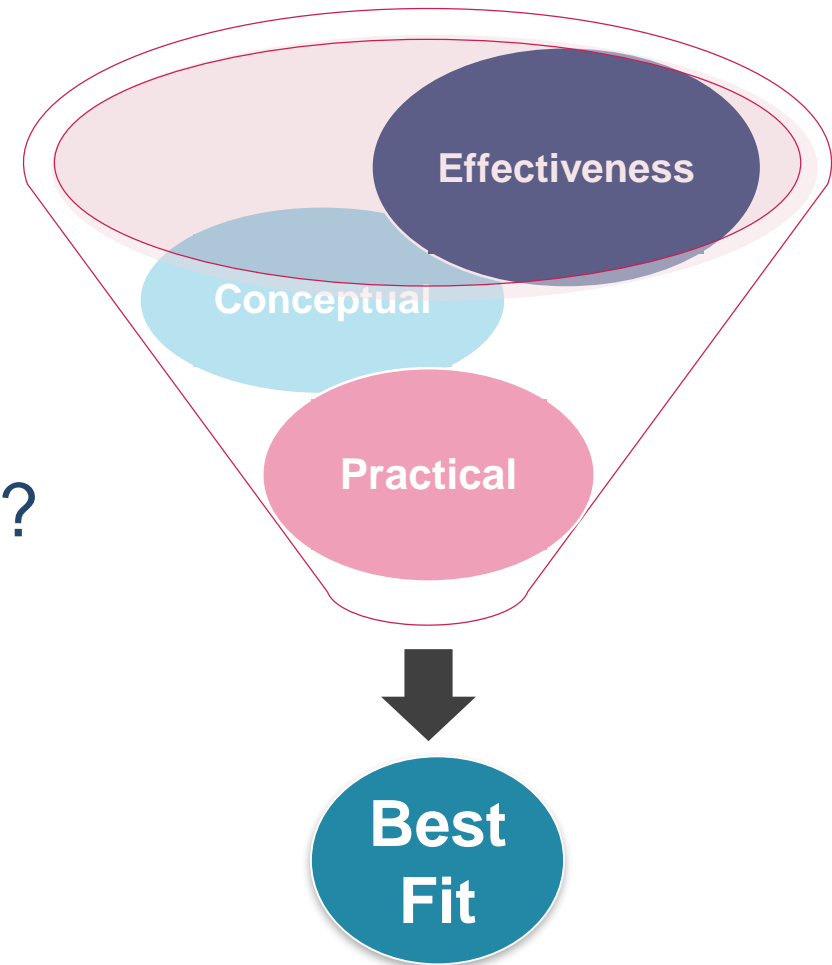

- Is the intervention effective?

Conceptual Fit

- Will the intervention have an impact on the selected risk factor?

Practical Fit

- Is the intervention feasible for the community?

Effectiveness: Is it Evidence-Based?³

It has been included in a federal registry of evidence-based interventions.

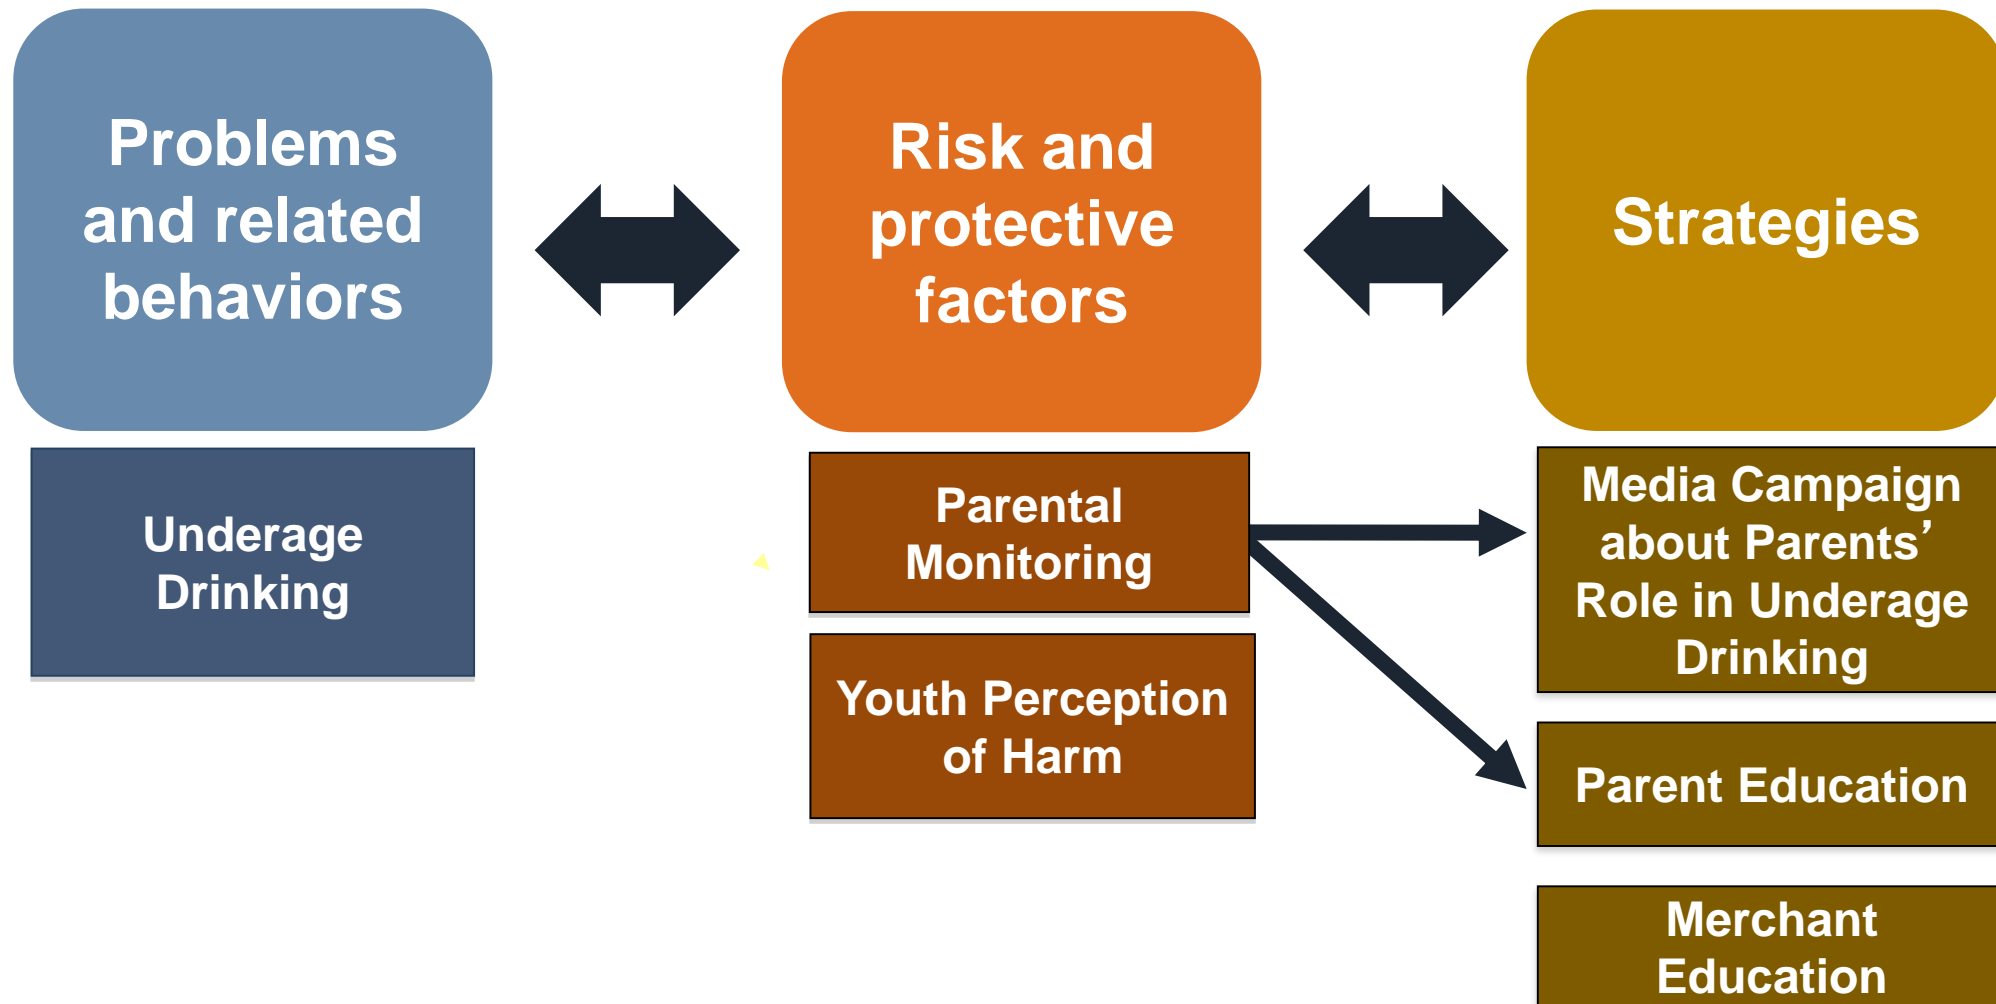

It has been reported in peer-reviewed journals with positive effects.

It has documented effectiveness that is supported by other sources of information and the consensus of experts.

Conceptual fit: Is it Relevant?

Practical Fit: Is it Appropriate?

Cultural Competency Check

Guiding the Planning Process

Assessing and Building Capacity

**Problems
and related
behaviors**

**Risk and
protective
factors**

Strategies

- **Magnitude**
- **Time trend**
- **Severity**
- **Comparison**

- **Importance**
- **Changeability**

- **Evidence-based**
- **Conceptual fit**
- **Practical fit**

A Comprehensive Prevention Plan

Describe the priority problem and why it was selected.

List risk and protective factors, and describe how they were prioritized.

Describe resources, resource gaps, readiness, and cultural issues, and how any challenges will be addressed.

Describe interventions that will impact the selected risk factors.

Develop a logic model with short- and long-term outcomes.
