This webinar is being recorded and archived and will be available for viewing after the webinar. Please contact the webinar facilitator if you have any concerns or questions.

Developed under SAMHSA Cooperative Agreement #H79SP081015-01.

Prevention Technology Transfer Center Network

Funded by Substance Abuse and Mental Health Services Administration

PTTC Network

Purpose of the TTCs

Develop and strengthen the workforces that provide substance use disorder and mental health disorder prevention, treatment, and recovery support services.

Help people and organizations incorporate effective practices into substance use and mental health disorder prevention, treatment and recovery services.

PTTC Network Approach

The PTTCs...

Develop and disseminate tools and strategies needed to improve the quality of substance abuse prevention efforts

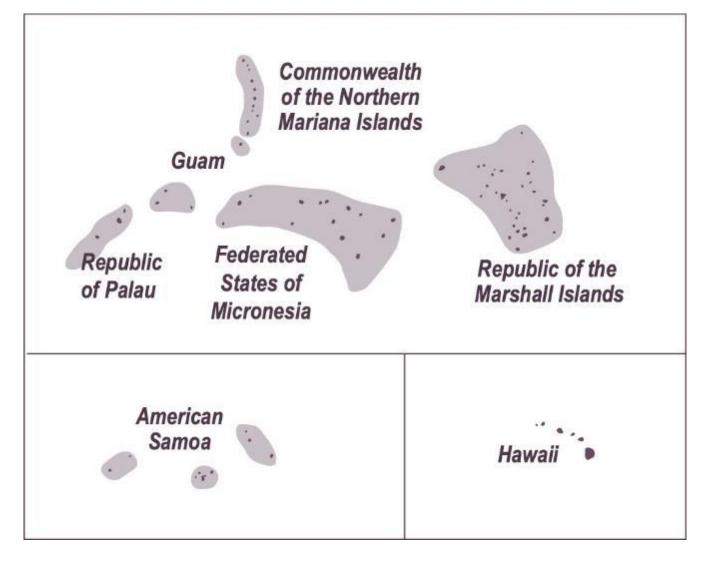

Provide training and resources to prevention professionals to improve their understanding of

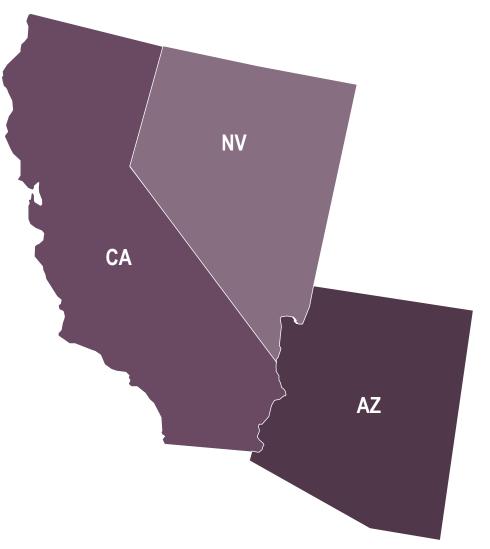

- prevention science,
- how to use epidemiological data to guide prevention planning, and
- selection and implementation of evidence-based and promising prevention practices.

Develop tools and resources to engage the next generation of prevention professionals

Presenter and Special Guest

Kristen Gabrielsen, MPH, has worked in substance misuse prevention for nearly 30 years. She served as the Associate Director of the Western Center for the Application of Prevention Technologies (CAPT), co-authored the first Substance Abuse Prevention Specialist Training curriculum, and co-authored the textbook, Substance Abuse Prevention: The Intersection of Science and Practice. She currently works with states and communities across the nation to bridge the gap between research and practice by assisting prevention professionals in maximizing their effectiveness

Wa'Lynn Klein, Mt. Baker Community Coalition Coordinator has been a member of the Mount Baker community for nearly 20 years. She studies leadership at Trinity Western University and received her Certificate of Prevention Professional from the Prevention Specialist Certification Board of Washington and IC&RC in 2019. A mother of 4, she invests in healthy youth development through volunteer work in her off time. She has a love for prevention, and believes the frameworks, when trusted and followed create magic in community.

Questions?

Implementation Task #2

Mobilize support and build capacity

Carry out evidence-based interventions

Monitor implementation

Implementation

Task #2 To-do List

- 2a. Balance fidelity with adaptation
- 2b. Develop and carry out an action plan

2a. Balance Fidelity with Adaptation

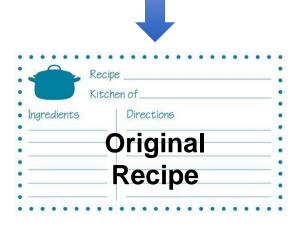

- Fidelity is the degree to which a program is implemented as its developer intended
- Sometimes adaptations are necessary, but this must be done very carefully

The Importance of Fidelity

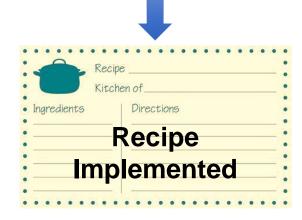

Planned Cake

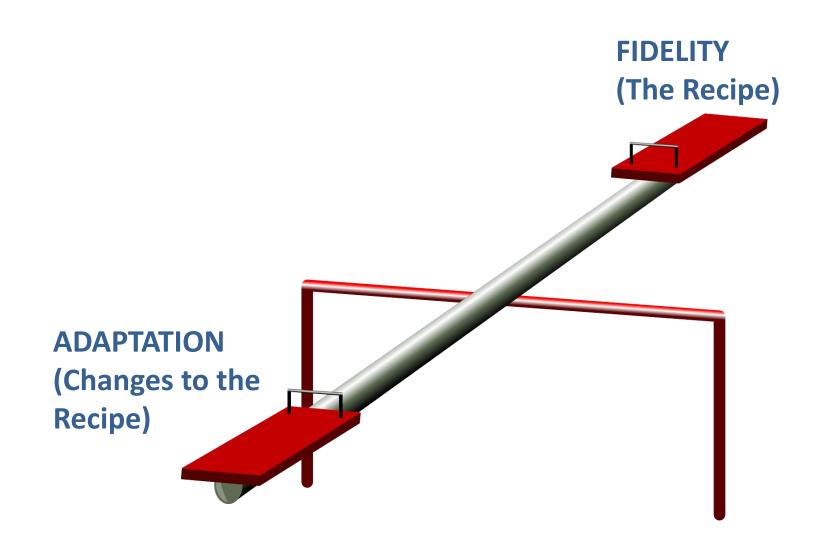

My Neighbor's Cake

Fidelity and Adaptation "Seesaw"

Core Components

- The most essential and indispensable components of a practice or program
- Represents elements of the practice or program that are:
 - Responsible for how and why we expect change to occur
 - Key delivery steps of an evidence-based approach

Identifying Core Components

Core components can be identified through:

- Program developers and materials
- Research
 - Evaluation reports
 - National registries
 - Peer-reviewed journals
- Guidance from funders

Challenges to Fidelity Include Changing...

- To whom the program was delivered (intended audience, drop outs, new folks added)
- Who delivered the program (facilitator trained, change of facilitator)
- Content (delivered all content as designed?)
- Setting (time, place)
- Method (materials, length, timing, etc.)

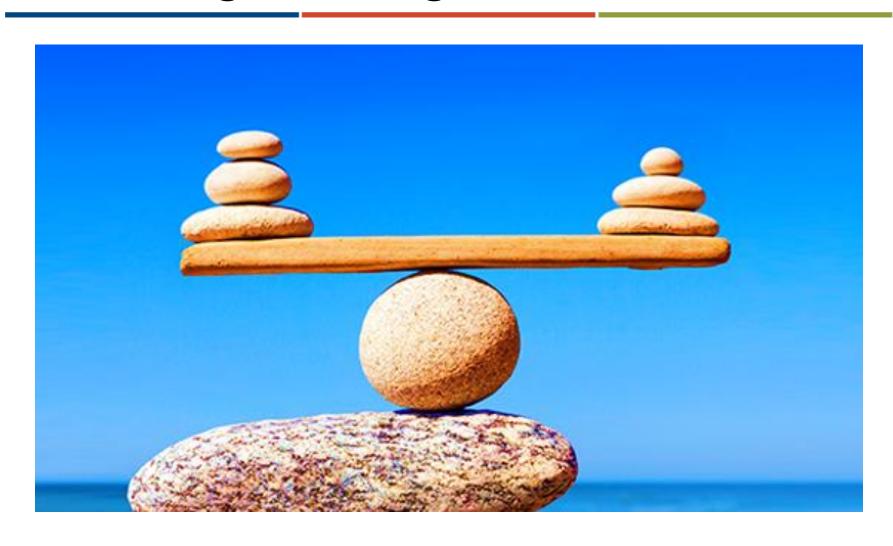

Guidelines for Adaptation

- Select programs with the best practical fit to local needs and conditions
- Change capacity before changing the program
- Consult with the program developer
- Retain core components
- Add, rather than subtract

Striking the Right Balance

Implementation Task #2

(Reminder of Where We Are)

Mobilize support and build capacity

Implementation

Carry out evidence-based interventions

Monitor implementation

Task #2 To-do List, part 2

2a. Balance fidelity with adaptation

2b. Develop and carry out an action plan

2b. Develop and Carry Out an Action Plan

- Purpose: To lay out exactly how you will implement a selected program, policy, or strategy
- Why? It's important to communicate openly and make sure that all partners are onboard with the implementation plan as you move forward

What To Include in Your Action Plan

Task	Who	Timeline	Resources Needed

- The specific tasks and activities necessary for implementation
- Who is responsible for completing each task
- Timeline for completing each task
- Resources needed to complete the task

Scenario: Dram Shop Liability Law Increasing Community Awareness

Your community successfully passed a new dram shop (commercial host) liability law.

- How could you assess and measure the fidelity of implementation?
- What kinds of tasks would you include in an action plan?

A "Real Life" Example of Task #2

Implementation Task #3

Mobilize support and build capacity

Implementation

Carry out evidence-based interventions

Monitor implementation

Task #3 To-do List

- 3a. Monitor implementation
- 3b. Make mid-course corrections

3a. Monitoring Implementation

- Is the intervention being implemented as planned?
 - Number of sessions
 - Target population
 - Time table
 - Staffing
 - Setting
- Have adaptations been made to the intervention? If yes, how was the decision made?

3b. Making Mid-course Corrections

If actual implementation differs from the planned implementation:

- Examine the reasons behind the differences
- Once the reason(s) have been identified, work to close the gap as much as possible

Scenario: Dram Shop Liability Law Increasing Community Awareness, continued

Your community successfully passed a new dram shop (commercial host) liability law.

- How would you monitor the implementation?
- When and how would you decide to make mid-course corrections?

A "Real Life" Example of Task #3

Topics Covered
