What should you be considering?

- What's the evidence for telehealth for prevention services?
- Can you bill for services?
- Is telehealth safe and secure?
- Do you have a videoconferencing software platform?
- How do I engage clients and stakeholders?

We wanted to know..

1. Which videoconferencing software programs are most often used in the telehealth literature?
2. What are the features and capabilities of these programs?
3. How might the features and capabilities of videoconferencing programs meet the needs of prevention specialists

Method

- Identifying software programs
 - Identifying candidate programs
 - Review of associated telehealth literature
 - Inclusion/exclusion
- Coding software programs
- Evaluating Research Support

Results

- 74 candidate software programs
- Only 12 candidate programs (16.4%) mentioned in the literature
- Seven mentioned in two or more empirical articles
- Search identified five current/surviving programs that have been used in at least two empirical studies:

Adobe® Connect™
