# Mastering Qualitative Research Skills: Environmental Scans and Asset Mapping

Session 4: March 14th, 2024

**PRESENTER:**  
**Josh Esrick, MPP**

Thank you for joining us today.  
We will begin promptly at **12 PM** Eastern.

While waiting for us to get started, please share in the chat if there are any T/TA topics you are interested in hearing more about from us in the future.

**SAMHSA**  
Substance Abuse and Mental Health  
Services Administration

# Technical Information

## ***SAMHSA***

Substance Abuse and Mental Health  
Services Administration

This training was developed under the Substance Abuse and Mental Health Services Administration's Prevention Technology Transfer Center task order. Reference # 1H79SP081018.

For training use only.

*Funding for this presentation was made possible by SAMHSA grant no. 1H79SP081018. The views expressed by speakers and moderators do not necessarily reflect the official policies of HHS; nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.*

**LIVE**

This webinar is now live.

It is being recorded.

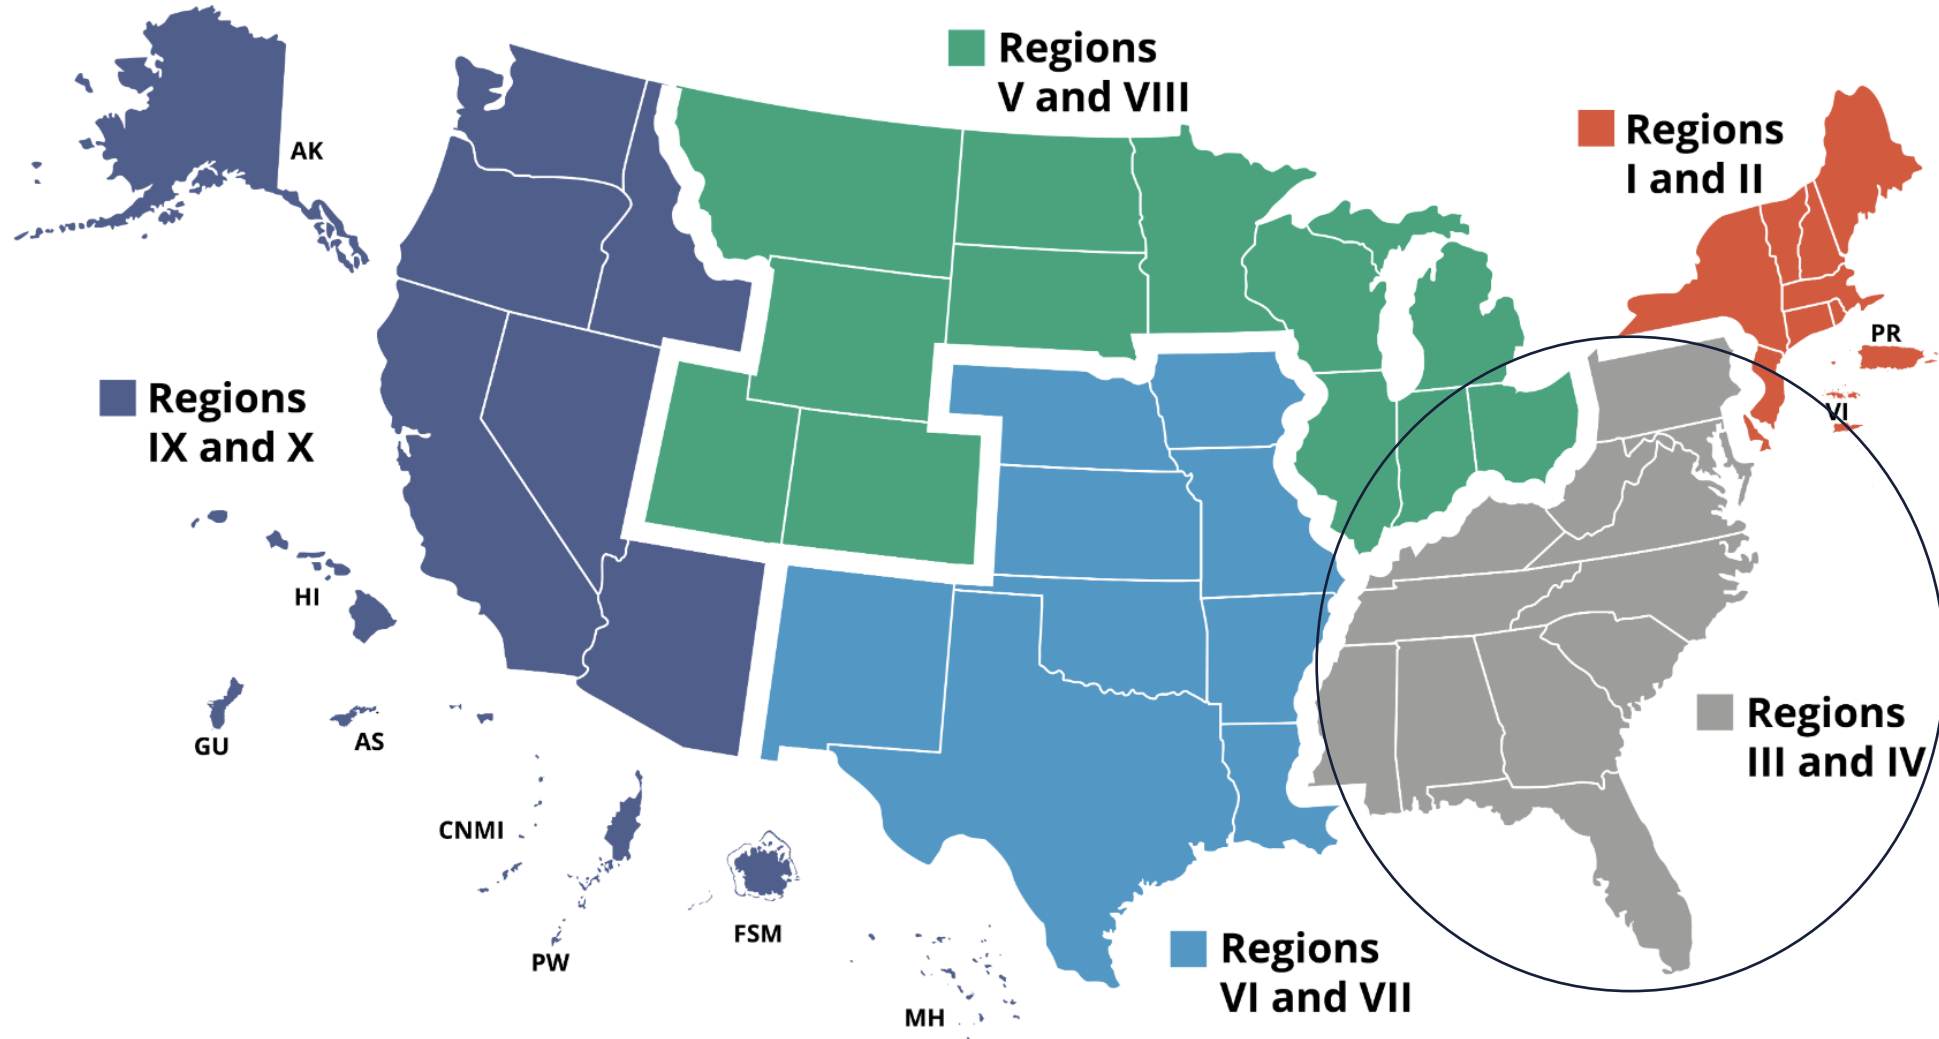

Please remain muted.

# What is SPTAC?

SAMHSA's Strategic Prevention Technical Assistance Center (SPTAC) is a national training and technical assistance system committed to helping SAMHSA prevention grantees move their prevention programs forward.

# How We Are Organized

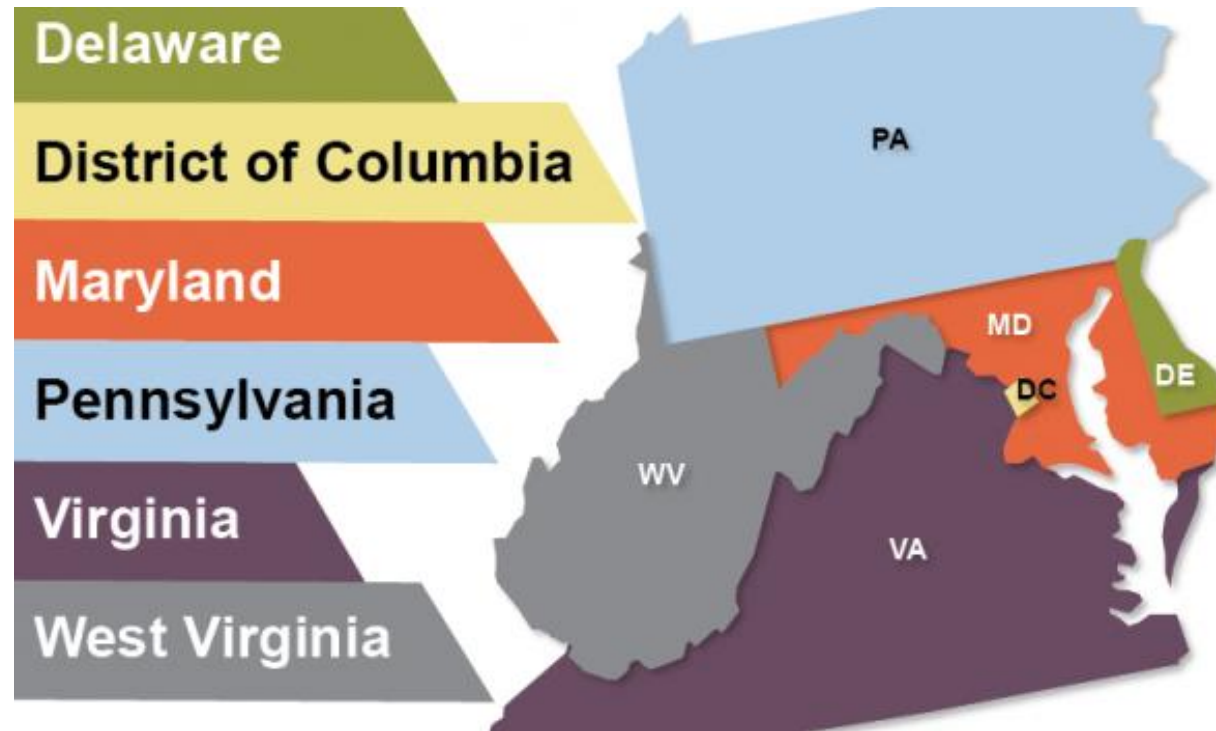

# Who We Serve

States, tribal entities, territories and communities supported under SAMHSA's Substance Abuse Prevention and Treatment Block Grant Program and Grants to Support Community-based Prevention Programs, as follows:

- Substance Use Prevention, Treatment, and Recovery (SUPTR) Block Grant
- State Strategic Prevention Framework–Partnership for Success (SPF-PFS)
- Sober Truth on Preventing Underage Drinking Grant Program (STOP ACT)
- Strategic Prevention Framework for Prescription Drugs (SPF Rx)
- Substance Abuse and HIV Prevention Navigator Program (formerly MAI)
- Prevent Prescription Drug/Opioid Overdose-Related Deaths (PDO)
- State First Responders–Comprehensive Addiction and Recovery Act (FR-CARA)
- Improving Access to Overdose Treatment (OD Tx)

# Central East Region

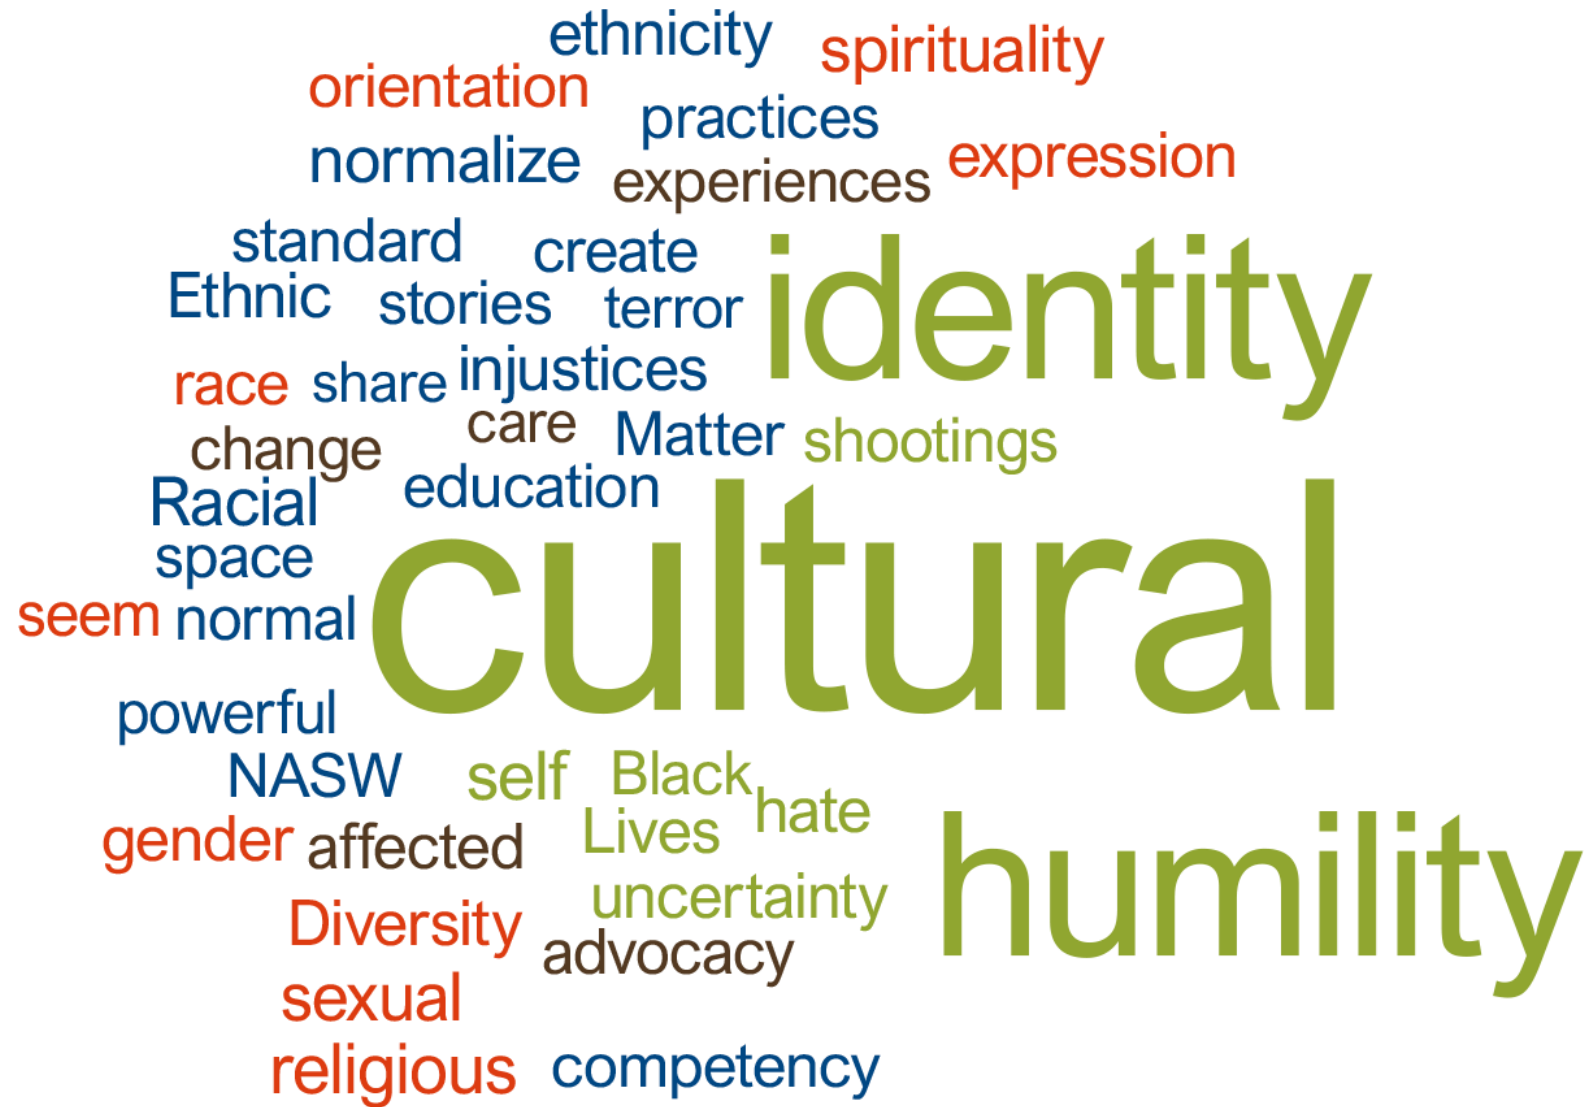

## HHS REGION 3

# Southeast Region

## HHS REGION 4

The use of affirming language inspires hope.

LANGUAGE MATTERS.

**Words have power.**

PEOPLE FIRST.

The PTTC Network uses affirming language to promote the application of evidence-based and culturally informed practices.

# Presenter

**Josh Esrick**

# Learning Objectives

- Describe the importance of environmental scans and asset maps
- Explain the key elements of environmental scans and asset maps
- Recognize how to incorporate scanning and mapping findings into strategic planning

# The Importance of Scans and Maps

# What are Enviromental Scans?

- There actually isn't a single agreed upon definition!
- Can be a process for identifying:
  - Causes of health issues
  - Capacities for addressing issues
  - Barriers to addressing issues
  - Strategies for addressing issues
  - Other dimensions of an issue
- Basically, it's about learning more about an issue to better inform your strategic planning and decision making

# Environmental Scans vs. Needs Assessment

Generally, environmental scans (at least in public health!) are **broader** than needs assessments

Focused on the **big picture**, rather than the details

Provide **context**, and identify **areas to investigate further**, rather than identifying specific needs

Rely on **secondary data** rather than primary data

# Other Takes on Environmental Scans

CADCA

Narrowly defined as being a tool to learn specifics about the causes of substance misuse

CMS

Broadly defined as a process for comprehensively learning about the entire relevant environment around an issue

Businesses

Generally defined as processes for learning about events and how they might impact operations

# How Should You Define Them?

- In whatever way makes sense to you and is relevant to your organization's needs
- Just be consistent in your definition and clear to others
- Think through what you want to accomplish and how it differs from a comprehensive needs assessment or epidemiological surveillance tools

# Why Care About Environmental Scans?

- Data and evidence are vital prevention efforts, but resources to collect them are often limited
- Environmental scans (assuming the general public health definition) can be used to guide your efforts
  - Help focus your needs assessment
  - Guide efforts to develop partnerships
  - Determine what interventions to learn more about
  - Support implementation and evaluation efforts

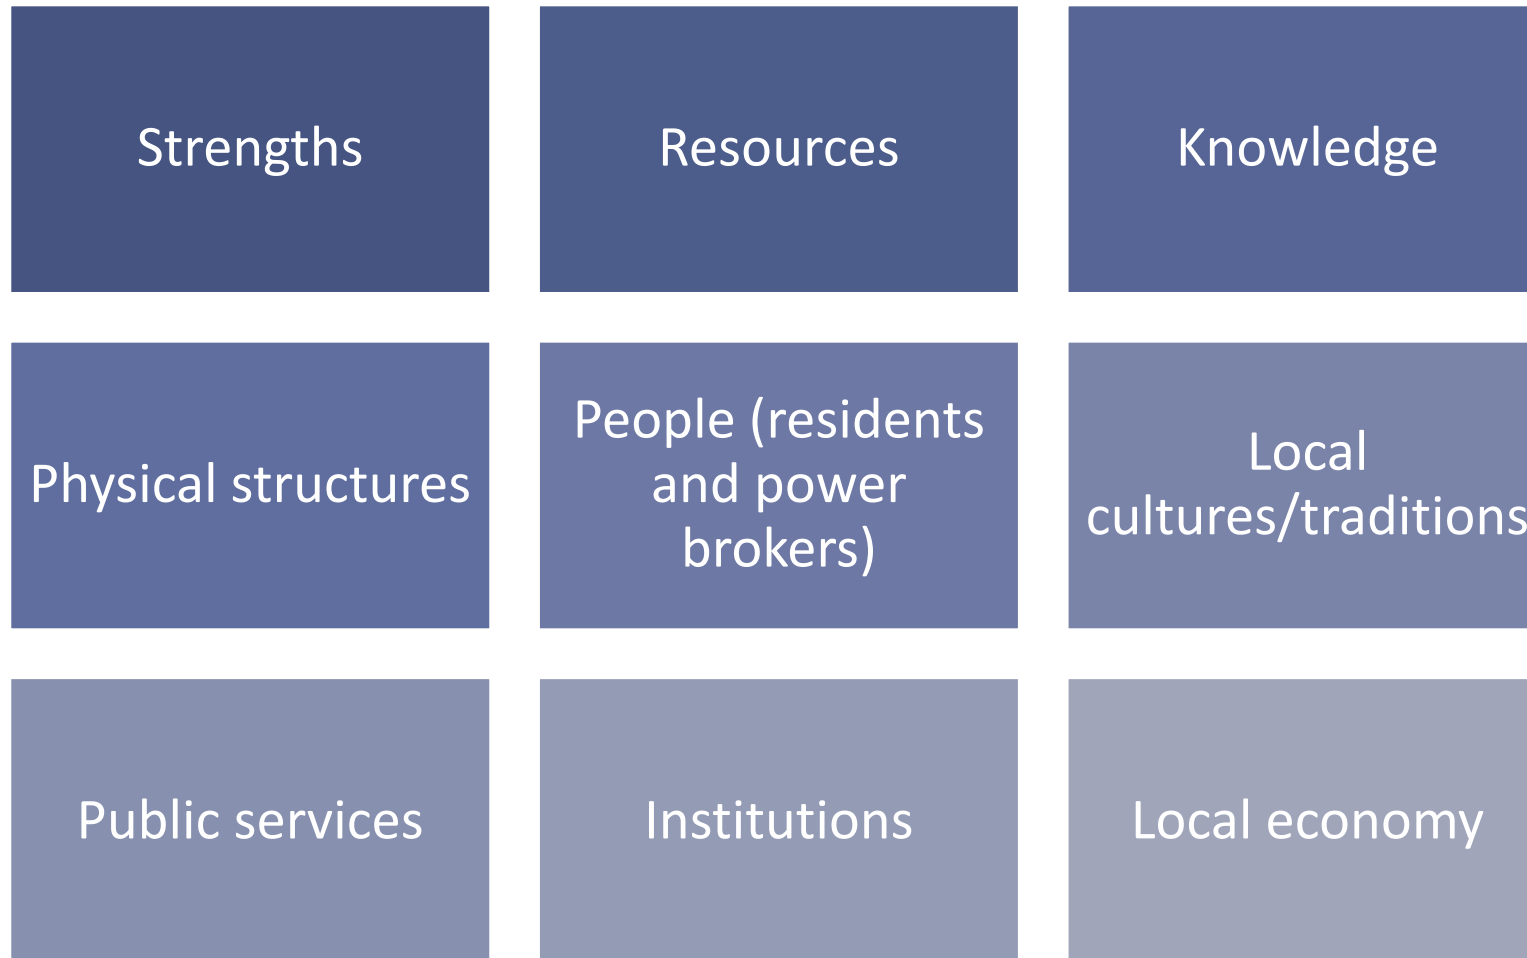

# Asset Maps

# What is Asset Mapping?

- A strengths-based approach to community development focused on identifying and leveraging **existing resources** within a community
  - What a community has instead of what it needs
- “A systematic process of cataloging key services, benefits, and resources within the community ... to identify community assets and strengths” (RHHub)
- Commonly visualized through diagrams or GIS/spatial mapping

# What Types of Information Can Asset Maps Provide?

# Why Care About Asset Maps?

- They are a key part of the strategic planning process
- They can help you gain a deeper understanding of the community
  - Resources, culture, relationships, power, structures
- They are helpful for obtaining “buy-in” from community members
- They can help identify key stakeholders/opportunities for partnership
- They can help you make important decisions about priorities for prevention program planning

# When to Use Asset Maps?

# Key Elements of Environmental Scans and Asset Maps

# Environmental Scans Elements

- The exact elements will change depending on what definition we use; let's go through a few examples
  - PESTLE analysis
  - SWOT analysis
  - CADCA's "4 P's"
  - GIS (Geographic Information Systems) analysis

# PESTLE

# SWOT

# The 4 P's

PRICE

PRODUCT

PROMOTION

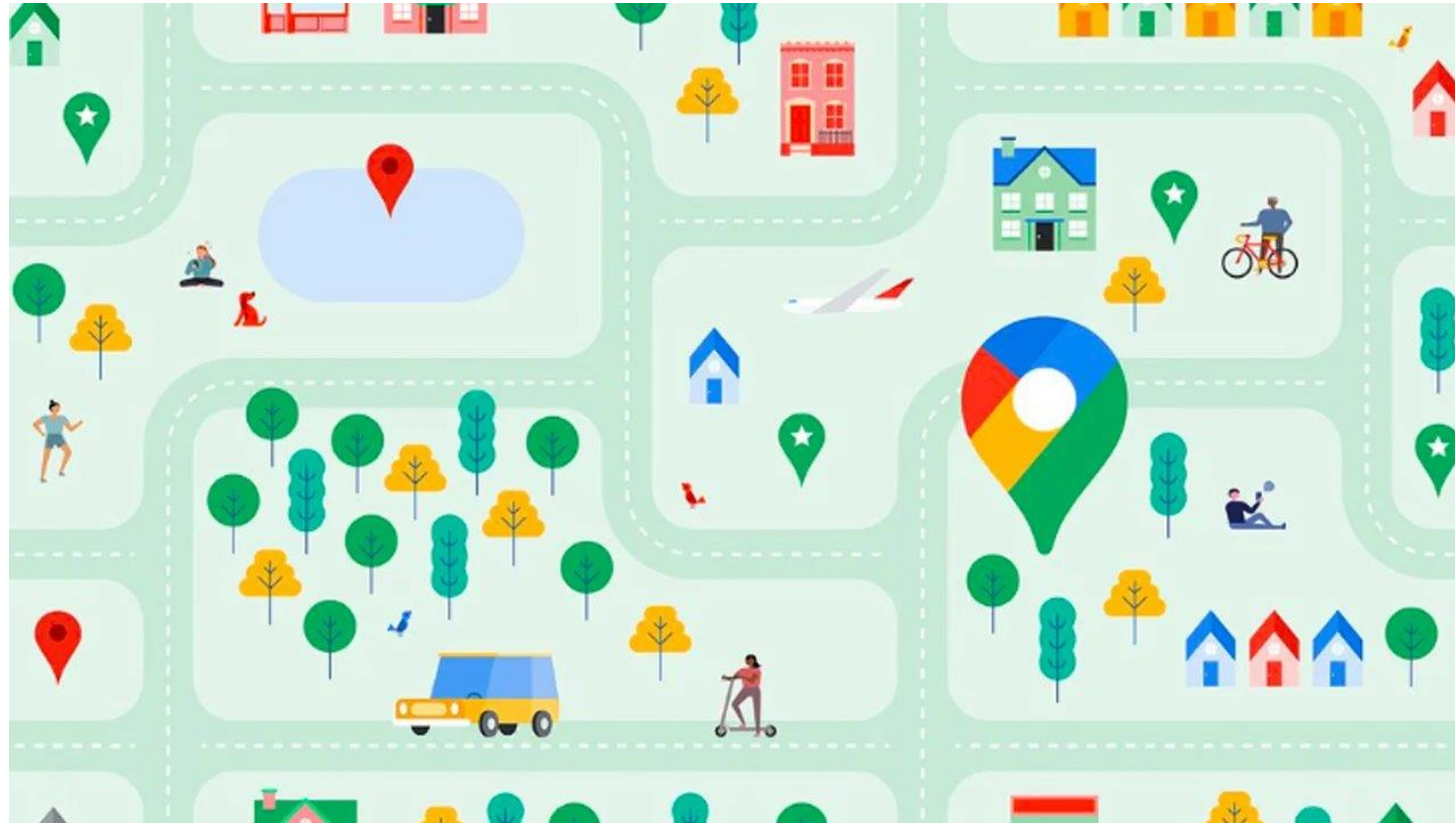

PLACE

# Geographic Information Systems

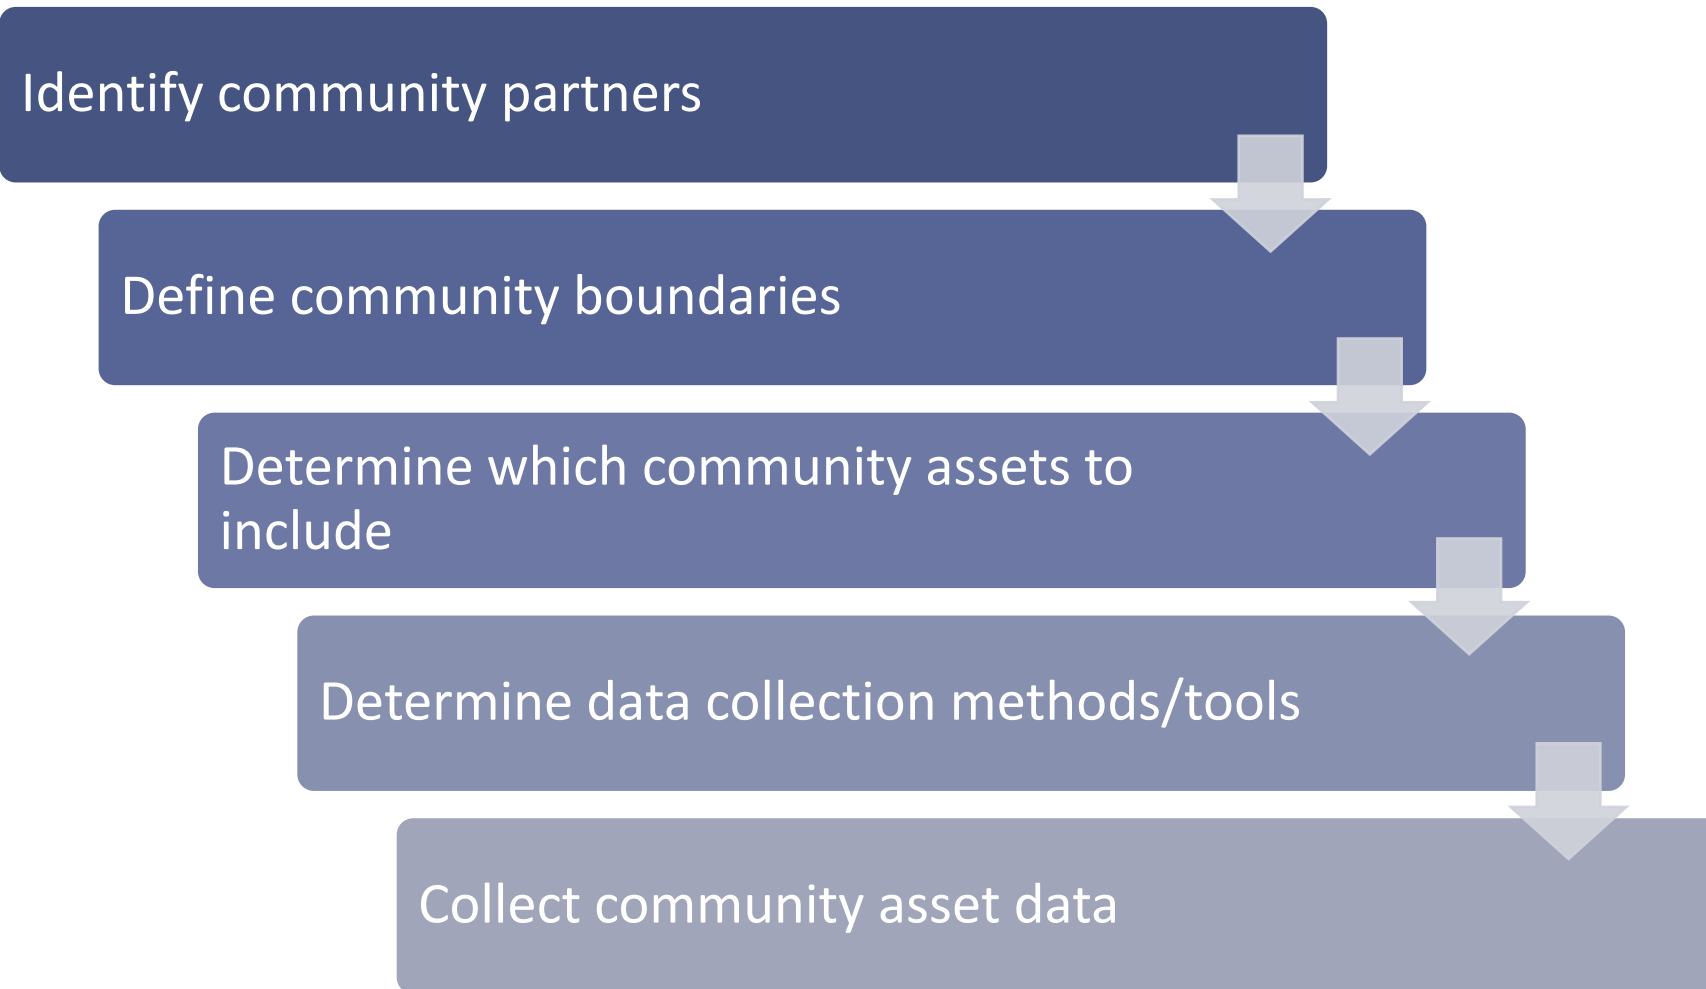

- Using digital mapping software to link data to geographic locations
- Allows for tracking the spread or incidence of substance use or overdoses
- Can also track risk & protective factors and population clusters
- Requires location information about your data

# Asset Map Elements

# Asset Mapping Process

# Collecting Data for Asset Mapping

# Asset Map Examples

## Associations

Animal Care Groups  
 Anti Crime Groups  
 Block Clubs  
 Business Organizations  
 Charitable Groups  
 Civic Events Groups  
 Cultural Groups  
 Disability/Special Needs Groups  
 Education Groups  
 Elderly Groups  
 Environmental Groups  
 Family Support Groups  
 Health Advocacy and Fitness  
 Heritage Groups  
 Hobby and Collectors Groups  
 Men's Groups  
 Mentoring Groups  
 Mutual Support Groups  
 Neighborhood Groups  
 Political Organizations  
 Recreation Groups  
 Religious Groups  
 Service Clubs  
 Social Groups  
 Union Groups  
 Veteran's Groups  
 Women's Groups  
 Youth Groups

## Physical Space

Gardens  
 Parks  
 Playgrounds  
 Parking lots  
 Bike Paths  
 Walking Paths  
 Forest / Forest Preserves  
 Picnic areas  
 Campsites  
 Fishing spots  
 Duck ponds  
 Zoos  
 Wildlife center  
 Natural Habitats - coastal, marine, amphibian  
 Bird Watching Sites  
 Star Gazing Sites  
 Housing  
 Vacant Land & Buildings  
 Transit stops and facilities  
 Streets

## Institutions

Schools  
 Universities  
 Community Colleges  
 Police Departments  
 Hospitals  
 Libraries  
 Social Service Agencies  
 Non Profits  
 Museums  
 Fire Departments  
 Media  
 Foundations

## Individuals

Gifts, Skills, Capacities, Knowledge and Traits of:

Youth  
 Older Adults  
 Artists  
 Welfare Recipients  
 People with Disabilities  
 Students  
 Parents  
 Entrepreneurs  
 Activists  
 Veterans  
 Ex-offenders

## Local Economy

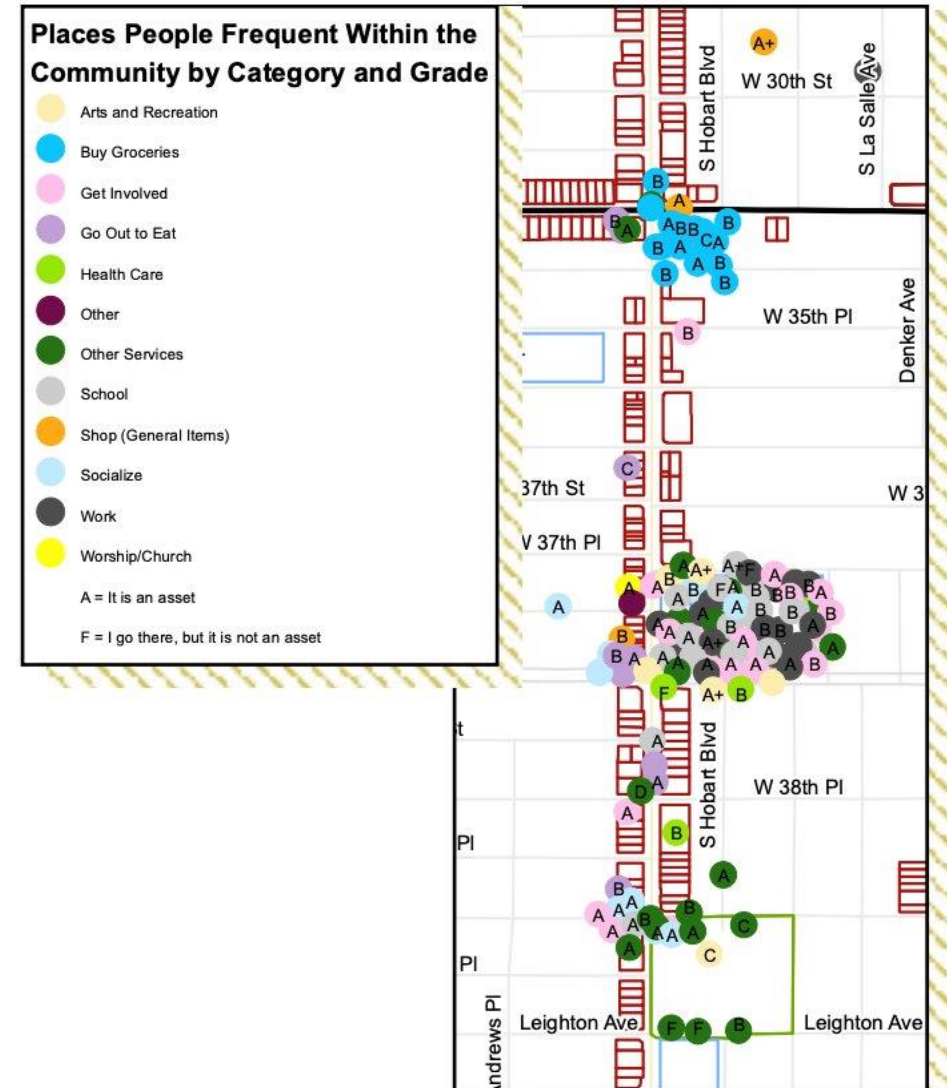

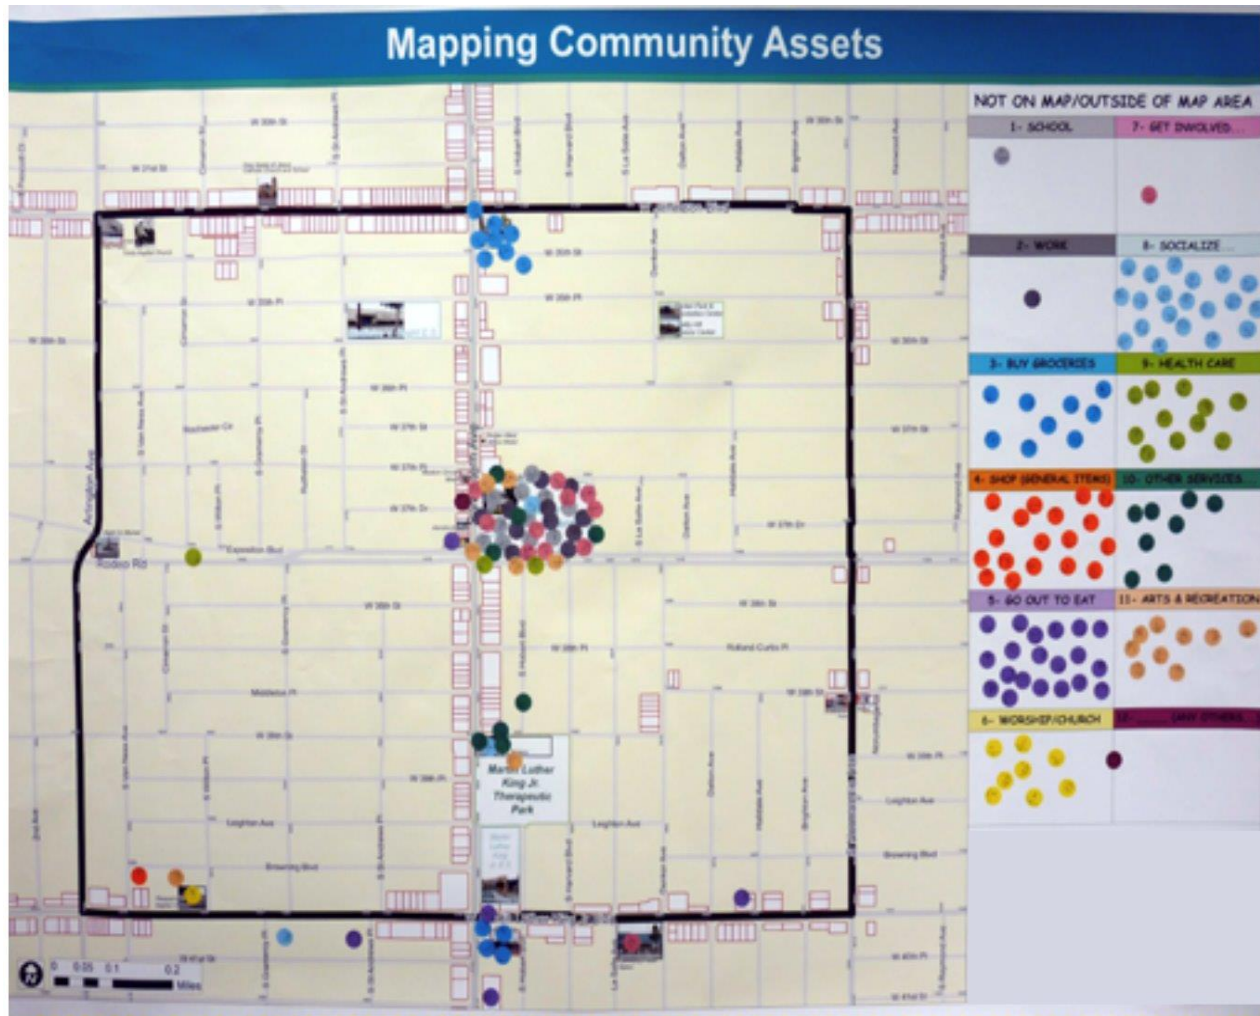

For-Profit Businesses  
 Consumer Expenditures  
 Merchants  
 Chamber of Commerce  
 Business Associations  
 Banks  
 Credit Unions  
 Foundations  
 Institutional - purchasing power and personnel  
 Barter and Exchange  
 CDCs  
 Corporations & branches

# Asset Map Examples

# Asset Map Examples

# Incorporating Scans and Maps into Strategic Planning

# Step 1: Assessment

# Step 2: Capacity

# Step 3: Planning

# Step 4: Implementation

# Step 5: Evaluation

# Summary

- Environmental scans and asset maps are valuable tools for informing your strategic planning efforts
- There are multiple ways of conducting them; consider your specific needs and capacity when deciding what to do
- Seek out guides and resources to learn more, including materials originally developed for other sectors (e.g., private industry)
